

Real Estate and Construction Division

22 September 1976

the

On the afternoon of 21 September/Division was contacted by Mr. James G. Whitlock, Director, Space Management Division, Office of Space Planning and Management, GSA (Central Office) who stated that CIA was the only one of 20 government agencies who had not yet responded to the Presidential Management Initiative re space utilization. The Division was unable to provide a ready answer but on the morning of 22 September was able to ascertain from [REDACTED] that CIA's PMI report re space utilization had been forwarded directly to OMB. Because of the sensitivity of this and some of the other requests made under the aegis of PMI it had been determined jointly by the representatives of DDA and the Office of the Comptroller that the data would be classified and furnished directly to OMB. On the afternoon of 22 September the sum and substance of this program and its reporting channels were passed telephonically to Mr. Dale Mutchler, Mr. Whitlock's deputy at GSA. Mr. Mutchler appreciated the problem and seemed concerned only that CIA had responded and did not need the actual data which had been furnished to OMB.
